

OVERVIEW

Hello,

Thanks for your interest! Enjoy the PDF 😊.

This strategy study has been conducted **on GBP-USD on a 5-min Chart, Eightcap Broker**. From 2023/01/01 to 2023/09/19, **(We decided to test from the start of 2023)**.

In this strategy, we've simulated the results of 30x leverage, a practice widely employed in Forex. By doing this, we need to maintain a low risk per trade. Let's break it down.

We start with an initial capital of \$10,000 and an order size of \$2,000. With the application of 30x leverage, our order size increases to \$60,000. Despite this increase, we've managed to keep the stop loss at 0.3%. Consequently, the risk per trade remains at a manageable level.

To be specific, here's how the calculation works: Our risk per trade is the product of our order size (\$60,000) and our stop loss (0,3%). That comes to \$180, which is 1.8% of our initial capital.

We take profits in 4 different sell orders where we unload 25% of the position at each order. Please note that the buy and sell orders are custom signals with unique names. So, if they seem unfamiliar, there's no cause for concern. To gain a deeper understanding of Easy Trade Pro and its operation, we invite you to read our "Guidebook", accessible also on our website.

GPB/USD 5-minute, Eightcap Broker:

- **Initial Capital:** \$10,000
- **Leverage:** X30
- **Buy Order Size:** \$10,000 (our capital \$2,000, we borrowed \$58,000)
- **Date (y/m/d):** 2023/01/01 to 2023/09/19 (**We decided to test from the start of 2023 on Eightcap**)
- **Stop Loss:** 0.3%
- **Buy [custom order type]:** Bullish Reversal + 3 candle of confirmation
- **Sell [custom orders]:** 4 different sell orders where we unload 25% of the position at each order
- **Sell [custom orders types]:** 1TP 'Bearish Reversal' + 0 candle of confirmation, 2TP 'Good Sell', 3TP 'Bearish Reversal' + 0 candle of confirmation, 4TP 'Good Sell'

RESULTS

Our trading strategy has showcased impressive results. Out of 778 closed trades, **we secured a 73.39% win rate, leading to a net profit of \$4,083.05, a 40.83% increase from our initial \$10,000 capital.** Our strategy showed resilience with the Maximum Underwater metric registering never negative cum profit data.

What is the Maximum Underwater metric? Maximum Underwater represents the most significant dip in cumulative profit before a recovery. It's a crucial indicator of a strategy's fortitude during downturns and its recovery potential. In our analysis, it reveals the actual risk endured over the trading period, helping us effectively manage risk and set accurate expectations.
